## TO WHOM IT MAY CONCERN,

I am Veerti Kothari, a 19-year-old studying Information Technology at Jai Hind College currently in SY Degree. I have been very eager about IT, Ethical Hacking, Programming, and Robotics since I was a child and started coding at 12 with Whitehat Junior. I've made various games and applications like a storytelling app with a frontend using React and a backend on Firebase. Along with that, a mental health app has information and remedies for various mental health diseases, it has its own chatbot which talks to you and gives you solutions to other day-to-day problems. I have also completed a UI/UX course from GUVI, which is affiliated with IIT-M and IIM-A. I was also part of an IT exhibition in my first year called TechSrujan where we made an emotion-detecting app.

Along with this, I have a proven track record of organizing successful events. Starting from my FYJC year, I was an integral part of the Social and Dramatic Union of Jai Hind College and Sindhi Committee, where I served as a technical member. In my SYJC year, I quickly rose to the top and became the Head of the Department of Technicals for the Sindhi Committee. In my FY Degree, I was the Head of the Technicals Department of the Social and Dramatic Union of Jai Hind College. Under my dynamic leadership, my team and I have organized several high-profile events, including Teacher's Day, FYJC Freshers, FY Degree Freshers, a workshop with Shehzaan Khan, and promotions for Akull, Babil Khan, and Medha Rana's movie "Friday Night Plan." Last year, we successfully organized Jai Hind College's official traditional day - Rose Day, Performer's Paradise, and other promotional events. The highlight of our success last year was SHOUTTTT, a 4-day event comprising 55+ events with multiple rounds.

With a strong foundation in technology and proven leadership skills, I am excited to bring my expertise and passion to new challenges and opportunities. Thank you for considering my profile.

SINCERELY,

VEERTI KOTHARI
